Career Objective

Enthusiastic and dedicated Registered Nurse with strong communication skills and a solid foundation in healthcare protocols and best practices. Seeking a position in public health to enhance my professional skills, build long-term relationships, and contribute to improved patient outcomes.

Project & Research

Title: A Pre-Experimental Study to Assess the Effectiveness of a Structured Teaching Programme on Knowledge Regarding Hazards of Junk Food among School Students of Selected Private School, Coimbatore.

A pre-experimental research study was undertaken to assess the effectiveness of a structured teaching programme in enhancing the knowledge and awareness of school students regarding the health hazards associated with the consumption of junk food. The study was conducted among students of a selected private school in Coimbatore, aiming to evaluate the impact of educational intervention on their understanding of nutritional risks, lifestyle diseases, and the long-term consequences of poor dietary habits. The findings aimed to support the integration of structured health education in school curricula to promote healthier food choices among adolescents.
