percentage :69%

About Me

I can work well under perssure and make the best of any situation. Passionate individual with great interpersonal and communication skills

Professional Experience

INTERNSHIP

A smart garage door with a motion sensor automatically opens the door when movement is detected , providing convenient and secure access. The sensor can also be programmed to trigger other actions, like turning on lights, based on motion.

KNEE OSTEOARTHRITIS PREDICTION

This project uses artificial intelligence and machine learning techniques to predict the presence or progression of knee osteoarthritis. By analyzing patient data such as medical images (like X-rays,MRI Scans) and risk factors to assist in early diagnosis and personalized treatment planning.
